

# Online Presentation Tools

Online or Digital Presentation Tools can be used to enhance a face-to-face presentation or to submit a presentation required for an assessment virtually (online). There are a number of tools that you can use to integrate different media, including visual images, video, documents, audio and websites, into your presentations.

## Benefits and Uses

Online, or digital, presentation tools offer benefits for **learners** such as:

- Ability to submit presentations online, or to enhance face-to-face presentations
- You can integrate a wide range of different media
- You can practice and record, then preview your presentation
- Share and collaborate on presentations with others for team-based assessments
- It's fun and creative

## Online/Digital Presentation Tool Options

**Microsoft Powerpoint** – create basic and automated slide show that includes images, text, links, interactivity – see [Tutorial](#).

**MS Photostory** – build a digital story from photos, text and audio narration. See [Tutorial](#) and Workout Guide.

**Prezi** - see Workout Guide

**Wordle** - see Workout Guide
